Coalesix Names Bill Hayden as Senior Vice President of Sales and Marketing

(April 15, 2005, Cambridge, MA) -- Ensuring that its mission to improve drug discovery will be effectively conveyed, Coalesix today announced the appointment of Bill Hayden to its senior team to lead its sales and marketing efforts. Hayden will serve as Senior Vice President of Sales and Marketing.

A veteran of the chemo-informatics sector, Hayden previously played a key role in the founding and subsequent success of one of the leading players in the computational chemistry software marketplace. Hayden also has several years of experience providing strategy and commercial consulting services to companies in a variety of technology-based arenas.

“We are delighted to have such an experienced industry leader join the Coalesix team,” said Paul Edwards, Coalesix President and CEO. “Bill shares our passion for improving the efficiency of drug discovery and assisting pharmaceutical companies in bringing new drugs to those who need them. With his leadership, I am confident Coalesix will be able to successfully communicate the power of our Candidate Design Environment (CDE).”

In accepting his new role, Hayden praised the Coalesix team for its wealth of knowledge and domain expertise, as well as its strong drive and enthusiasm. “I was very impressed upon first seeing the Coalesix CDE. It has been carefully thought out, developed and implemented.”

Hayden believes Coalesix’s thorough groundwork will result in an environment that maximizes the pharmaceutical industry’s drug discovery resources. “Coalesix finally satisfies the industry’s desire to foster more efficient communication between the technology of the computational chemist and the intuition of the medicinal chemist, inevitably resulting in the delivery of more and better drug candidates.”

Headquartered in Cambridge, MA, Coalesix focuses on the development and commercialization of technology to improve the efficiency of drug discovery through the

use of its *Mobius* Candidate Design Environment (CDE). *Mobius* offers drug discovery organization the ability to maximize the return on all of their Lead optimization efforts and resources while at the same time helping overcome the lead-to-candidate bottleneck. The *Mobius* CDE fosters interactions between computational and medicinal chemistry to produce a novel approach to address the challenges of Lead Optimization in order to enable faster identification of more potential drug candidates.

More information on Coalesix and the *Mobius* CDE can be obtained by contacting Bill Hayden, Senior Vice President, at 514-895-2455 or bill@coalesix.com
